Portfolio Purpose

This portfolio gives recruiters, hiring managers, founders, directors, and technical interviewers a fast view of my strongest work across full-stack development, government technology, enterprise systems, healthtech, compliance platforms, and product delivery.

It is designed to support applications for Senior Full-Stack Developer, Technical Lead, Solutions Architect, Senior Frontend Engineer, Tech Consultant, Technical Project Manager, and Digital Transformation roles.

7+ Years	Enterprise	Government	Full-Stack	Leadership
software delivery	ERP and workflows	public sector platforms	web, APIs, mobile	teams and clients

BEST-FIT ROLE TRACKS

Senior Full-Stack Developer

React.js, Node.js, Laravel, APIs, databases, ERP systems, enterprise-grade web platforms.

Technical Lead / Solutions Architect

Architecture, delivery leadership, team mentorship, system integration, client-facing technical decisions.

Senior Frontend / React Developer

Responsive interfaces, React.js, Next.js, TypeScript, UI architecture, accessibility, performance.

Tech Consultant / Technical Project Manager

Digital transformation, stakeholder communication, delivery planning, client training, risk management.

WHY SAMUEL

PROFESSIONAL VALUE PROPOSITION

I combine hands-on engineering depth with consulting, product delivery, and leadership experience. My strongest value is in building practical, scalable platforms for organizations where reliability, usability, security awareness, and stakeholder adoption matter as much as code.

Enterprise Systems

Designed and delivered platforms that support complex internal workflows, reporting, approvals, and operational visibility.

Government Technology

Worked on digital platforms for public-sector and regulated environments, including workforce, licensing, compliance, and data systems.

Full-Stack Delivery

Built across frontend, backend, APIs, databases, integrations, admin portals, and mobile-ready experiences.

Technical Consulting

Translated business requirements into system designs, technical scopes, delivery plans, documentation, and user adoption support.

Product and MVP Execution

Helped move ideas from requirements to usable products, including fast MVP delivery for healthtech and digital services.

Team Leadership

Led, mentored, trained, reviewed, and coordinated across developers, researchers, analysts, clients, and non-technical stakeholders.

CORE TECHNOLOGY STACK

Frontend

React.js, Next.js, Vue.js, Angular, Gatsby, TypeScript, JavaScript, HTML5, CSS3, Tailwind, Bootstrap

Backend

Node.js, Express, Laravel, Symfony, PHP, ASP.NET MVC/Boilerplate, REST APIs, GraphQL APIs

Databases and Data

MySQL, PostgreSQL, MongoDB, Firebase, SQL, reporting workflows, structured business data systems

DevOps and Tools

Git, GitHub, GitLab, Azure DevOps, Docker, Netlify, Microsoft Azure, Postman, Chrome DevTools

Delivery Process

Agile, Scrum, Kanban, Jira, ClickUp, Zoho, Slack, Teams, QA, testing, code review, documentation

Business Skills

Technical consulting, project management, team leadership, training, stakeholder alignment, SEO and digital analytics

Product Domains

GovTech, ERP, compliance systems, healthtech, workforce platforms, corporate websites, e-commerce, safety systems

Certifications

Google Project Management, Meta JavaScript Developer, Machine Learning Specialization, Meta Social Media Marketing

SELECTED WORK

SIGNATURE PROJECT SNAPSHOT

The projects below show the range of platforms I have delivered or contributed to across enterprise, government, healthtech, compliance, and commercial sectors.

Project / Platform	Sector	My Role	Value Delivered
NBET ERP	Enterprise / Energy	Lead Developer	Streamlined internal operations, workflows, and financial reporting.
NNPC ISSOW	Oil, Gas and Safety	Software Developer	Supported integrated safety and work management across facilities.
NELEX Portal and LMIS	Government / Labour	Developer / Architect	Enabled workforce processing and nationwide labour data visibility.
Federal Fire Service E-Certificate	Regulatory Compliance	Platform Developer	Improved certificate application, management, renewal, and compliance workflows.
E-NSITF	Social Insurance	Software Developer	Improved contribution management, automation, and transparency.
E-NIWA	Waterways / Licensing	Software Developer	Supported digital licensing and operational process automation.
Dial-a-Doc MVP	Healthtech	Architect / Lead Developer	Delivered mobile and web MVP within a 3-week timeline.
Akwa Ibom Medical Records	Healthcare Data	MVP Developer	Supported centralized patient record access and tracking.
National Quality Council	Quality Infrastructure	Web App Developer	Built web app and website for Nigeria quality infrastructure authority.
Corporate Platforms	Private Sector / Commerce	Web Developer	Built responsive sites and e-commerce platforms for several businesses.

CONFIDENTIALITY NOTE

Some government, enterprise, and internal client systems may be subject to confidentiality, NDA, access restrictions, or non-public deployment arrangements. Where live access, screenshots, repositories, or technical diagrams cannot be shared publicly, this portfolio summarizes my role and delivery contribution at a safe professional level.

DEEP DIVES

CASE STUDIES: ENTERPRISE AND GOVERNMENT PLATFORMS

NBET Enterprise Resource Platform

Enterprise resource planning and internal operations

Led development of an ERP platform for a national energy-sector organization, focusing on workflow automation, operational visibility, and financial reporting support.

- Led core development work for enterprise resource workflows.
- Supported automation of internal processes and reporting flows.
- Focused on maintainable, scalable features for organizational use.

Outcome: Enterprise workflow digitization, reporting support, better process visibility.

NELEX Portal and Labour Market Information System

Government workforce and labour data platforms

Designed and implemented scalable workforce management features to support applicant processing and nationwide labour data visibility.

- Worked across portal architecture, frontend delivery, backend integration, and user-facing flows.
- Supported structured labour data visibility and administrative processing.
- Contributed to government digital transformation in workforce services.

Outcome: Faster applicant processing, improved data access, and stronger nationwide labour visibility.

Federal Fire Service E-Certificate Platform

Public safety, compliance, inspection, and certificate management

Built a platform supporting applications, management, renewal, inspection workflows, and fire safety compliance administration.

- Developed user, admin, and operational workflows for certificate processing.
- Supported structured application management and compliance visibility.
- Improved the digital experience for regulatory service delivery.

Outcome: Improved compliance workflow, certificate processing, and operational efficiency.

DEEP DIVES

CASE STUDIES: SAFETY, COMPLIANCE AND NATIONAL PLATFORMS

NNPC ISSOW

Integrated safety and work management system

Delivered and supported an integrated safety and work management solution across multiple facilities, improving operational compliance and monitoring.

- Contributed to safety and permit-to-work style workflows.
- Supported operational monitoring and facility-level process visibility.
- Worked on system reliability and user experience needs for complex operations.

Outcome: Stronger safety process digitization, compliance support, and operational tracking.

E-NSITF and E-NIWA Platforms

Social insurance contributions and waterways licensing

Developed platforms supporting digital automation, licensing, contribution management, transparency, and administrative process improvement.

- Built and improved digital service flows for public-facing and administrative use.
- Focused on automation, usability, structured data, and reporting readiness.
- Supported operational transparency through digitized workflows.

Outcome: Enhanced automation, faster processing, and stronger visibility for regulated services.

National Quality Council Web App and Website

National quality infrastructure and public communication

Developed the web app and website supporting Nigeria quality infrastructure authority, with focus on digital presence, information access, and functional service delivery.

- Built public-facing web experience and functional web application components.
- Supported credibility, discoverability, and access to authority information.
- Balanced content presentation with administrative and usability needs.

Outcome: Improved digital presence and access to quality infrastructure information.

DEEP DIVES

CASE STUDIES: HEALTHTECH, DATA AND MVP DELIVERY

Sydani Technologies Dial-a-Doc MVP

Telemedicine mobile and web MVP

Architected and led mobile/web MVP development using React.js, Node.js, and React Native, with delivery completed within a 3-week timeline.

- Translated healthtech requirements into usable web and mobile flows.
- Coordinated fast MVP delivery while maintaining practical architecture.
- Worked across frontend, backend, API, and product usability needs.

Outcome: A functional MVP delivered quickly enough to support product validation and stakeholder review.

Akwa Ibom State Medical Records System

Centralized healthcare data management

Developed the MVP of a centralized medical records platform designed to improve accessibility, patient tracking, and healthcare data management.

- Supported structured patient record management and retrieval workflows.
- Focused on practical healthcare data access and administrative usability.
- Built an MVP foundation for future expansion and integration.

Outcome: Improved foundation for patient tracking, centralized records, and healthcare data accessibility.

Explore Independence Supported Accommodation System

Supported accommodation operations

Delivered system work for a supported accommodation environment, focused on operational tracking, digital workflows, and improved management visibility.

- Supported operational system design and workflow digitization.
- Focused on usable interfaces for administrators and operators.
- Built with the mindset of reducing manual coordination burden.

Outcome: Improved operational visibility and digital process support for accommodation management.

SELECTED PLATFORMS

CORPORATE, COMMERCE AND PUBLIC-FACING WEB PORTFOLIO

Beyond large enterprise and government platforms, I have built or contributed to responsive websites, e-commerce systems, corporate platforms, portals, and branded web experiences for multiple organizations.

Bisly Nigeria Corporate technology platform and client-facing digital presence.	**PGL Nigeria** Corporate and project-related web platform support.	**Piratech Nigeria** Technology company web presence and digital positioning.
Grandstack Corporate platform and web development work.	**DOSL Limited** Business website and user-facing digital presence.	**Gam-Omatic** Gaming/product-related web platform work.
Nikky's Luxury Tours Travel brand web experience and digital presentation.	**Flat Rate Water** Service-focused digital platform and web experience.	**Strong MAS** Corporate web presence and responsive interface delivery.
Ibom Paint Product and business web presentation.	**P2E Technologies** Technology-focused corporate platform work.	**Togg Clothing / Black and Co.** Fashion, clothing, and commerce-oriented digital platforms.

PRODUCT THINKING AND INNOVATION

Fintech and Micro-Payment Thinking

Experience and ongoing product thinking around micro-payments, QR payments, merchant/staff workflows, offline payment constraints, wallet logic, and payment user journeys in Nigerian environments.

AgriTech and IoT Product Thinking

Conceptual and technical planning around AI, IoT, farm participation, farm marketplace features, livestock operations, and remote monitoring workflows for agriculture ecosystems.

METHOD

HOW I DELIVER

1. Discover	2. Architect	3. Build	4. Verify	5. Adopt
Clarify goals, users, constraints, risks, data, integrations, and success criteria.	Design practical system structure, roles, database flows, APIs, modules, and deployment direction.	Develop frontend, backend, admin portals, APIs, dashboards, workflows, and integrations.	Use testing, QA, reviews, performance checks, user feedback, and issue resolution.	Train users, document processes, support launch, and improve after deployment.

LEADERSHIP EVIDENCE

Team Mentorship

Led frontend development and mentored junior developers, supporting code quality, practical learning, and delivery discipline.

Client Training

Trained client teams on new systems, helping improve adoption and long-term sustainability.

R&D Leadership

Led AI/ML research and development strategy, team training, market research, and product direction.

Delivery Ownership

Managed end-to-end technical projects with attention to timelines, budgets, stakeholder alignment, and quality standards.

AWARDS, SPEAKING AND CERTIFICATIONS

Recognition

Excellence in Software Innovation Award and Top Tech Consultant Recognition.

Speaking

Guest speaker and presenter on scalable enterprise systems, AI integration, and government digital platforms.

Certifications

Google Project Management, Meta JavaScript Developer, Machine Learning Specialization, Meta Social Media Marketing.
